THE LOCKER

MAY I KEEP
YOUR LUGGAGE?

MAY I KEEP YOUR LUGGAGE?

Let me introduce myself.

My name is Alfred and I will be if you wish the new butler of your hotel. It is very possible that you are wondering why you need me, but I would dare to say that, if you continue reading, you will reach this conclusion by yourself.

Due to my extensive experience, I know that your guests need someone to take care of their luggage when they arrive in advance and also when they leave the rooms before their return trip.

Of course, you wish to take care of your guests as well as possible and you could do it yourself. But I am conscious this is more work to add to the list for managing a hotel.

Would you like that I could be your Butler and do this task for you?

If you allow it, I think I am the most indicated person to do this task for your guests.

I am wishing to work for you. If you decide to hire me, I assure you that I will make your life and that of your clients much easier and more enjoyable.

THE SYSTEM

THE LOCKERS

Alfred has several columns of lockers with doors of different sizes. Each of them are connected to the control module that enables the door to open.

THE CONTROL MODULE

It contains the system computer, the screen with which the user interacts and the POS for payment by card and or currency. It is connected to the hotel power grid and is monitored by autonomous 4G from the control center. Its functions are

- Door opening.
- Power supply of locks at 24 volts.
 - Manage de charges.
 - Register all the operations.
- Liaise with the control center.

CUSTOMIZABLE PANELS

Our large colour assortment, allows all combinations to adapt the module to your corporative colours and to the ambience of the hotel.

SAT

Our after sales, solves in real time all problems that may happen. It is activated from the lockers terminal itself and is managed from the control center The Lockers Point.
